

Medicare Part D Drug Plan Search Instructions

To watch an instructional video, [CLICK HERE](#)

Step by step instructions:

1. Go to www.medicare.gov. It's recommended that you create an account, so you can store your information for the future.
2. Under "Find Health & Drug Plans," click "Find Plans Now."
3. Enter Zip Code, then click "Continue."
4. Select "Medicare drug plan (Part D)," then "Find Plans."
5. Select "I don't get help from any of these programs," then click "Continue."
6. The next page will say, "Do you want to see your drug costs when you compare plans?" Select "Yes," then click "Next."
7. Add your drug list by entering the name of the drug, correct dosage, quantity, and frequency.
8. After building your drug list, click "Done Adding Drugs."
9. Choose your pharmacy and click "Continue to View Plans" on the lower-right.
10. Medicare will now show the drug plan options, and you can sort (upper right) by "Lowest drug + premium cost". The first plan listed will result in the lowest prescription costs for you in 2026. You can compare multiple plans.
11. For each option, click "Plan Details" to see what you'll pay for each of your prescriptions at your preferred pharmacy.
12. If the plan shown at the top of the list is your current plan, you don't have to do anything, and your plan will automatically renew for 2026.
13. If the plan shown first is not your current plan, you will likely want to click "Enroll" for that option and continue through the application.
